01 Company Overview

SFA Globex FZCO is a Dubai-based trading company supplying ferro alloys and raw materials to steel plants, foundries and industrial buyers.

The company was established in 2017 to trade ferro manganese, silico manganese and ferro chrome. Since then the portfolio has grown to include ferro silicon, ferro molybdenum, manganese ore, chrome ore, stainless steel and aluminium scrap, and mild steel and stainless steel products.

Our management has long-standing connections with major ferro alloy producers in India. This allows us to procure material at competitive prices and match each buyer's grade and chemistry requirements.

We serve customers in the Middle East, Europe, Africa, India and Turkey, with a focus on cost efficiency, dependable supply and consistent quality.

Company information

Registered name	SFA Globex FZCO
Certificate no.	DMCC101415
Established	2017
Head office	Office 2005, Preatoni Tower, Cluster L, JLT, Dubai, UAE
Activities	Trading, financing and indenting
Core products	Ferro alloys and ores (6 material groups)
Customers	Steel plants, foundries, industrial buyers
Markets	Middle East, Europe, Africa, India, Turkey
Working hours	Monday to Saturday, 10:00 to 18:00

2017
Year established

500+
Customers worldwide

100,000+
Metric tonnes delivered

40+
Countries served

02 Management and Objective

SFA Globex was founded by experienced professionals from the ferro alloys industry, together with a young entrepreneur. The team combines long industry experience with a practical, customer-focused way of working.

Mr. Naresh Rawat
Founder. Veteran of the ferro alloys industry.

Mr. Rakesh Rawat
Founder. Veteran of the ferro alloys industry.

Ms. Gunjan Khandelwal
Founder. Entrepreneur known for her decisive approach.

Our objective

Our long-term objective is to establish and maintain trusted relationships with producers and buyers. We aim to be an approachable supplier for every industrial need, sourcing competitively without compromising on quality and serving buyers locally on a just-in-time basis.

We describe this as being a "glocal" company: **think globally and act locally.**

Company development

2017	Company established in Dubai to trade ferro manganese, silico manganese and ferro chrome.
Growth	Range extended to ferro silicon, ferro molybdenum, manganese ore and chrome ore.
Diversification	Scrap, mild steel and stainless steel products added. Financing and indenting activities introduced.
Today	More than 500 customers and over 100,000 MT delivered across 40+ countries.

What we stand for

Cost efficiency	Producer relationships that help us offer competitive prices.
Reliable supply	Deliveries planned around the buyer's production schedule.
Quality	Material checked against the agreed specification before shipment.
Relationships	Long-term partnerships with producers and buyers.

03 Business Activities

SFA Globex has divided its business into three segments. Together they help us secure material at the right price, widen the range we can offer, and support both producers and buyers.

01

Trading

Our management has close connections with major ferro alloy producers in India, which helps us procure material at competitive prices. We are also expanding into other noble alloys, carbon products and consumables required by steel plants.

02

Financing

We finance raw materials such as manganese ore for ferro alloy producers. This helps us negotiate competitive prices for finished goods. Financing customers are selected carefully, based on their capabilities, products and relationship with our company.

03

Indenting

For some products we work as an indenting agent for a small margin. This allows us to expand our product portfolio and meet a wider range of customer requirements.

How an order is handled

1	**Enquiry**	The buyer shares the product, grade or chemistry, quantity, size, packing, destination and required delivery date.
2	**Technical review**	We check suitable material against the buyer's minimum and maximum limits for elements such as Mn, Si, Cr, Mo, C, P, S and Al.
3	**Quotation**	We confirm availability and send a commercial offer with Incoterm and an estimated schedule based on origin and vessel availability.
4	**Order confirmation**	Chemistry limits, sizing, packing, documents and any third-party inspection are agreed before the order is confirmed.
5	**Sourcing and packing**	Material is secured from the producer and packed, usually in one-tonne bags or as specified by the buyer.
6	**Shipment and delivery**	Delivery to port, within the UAE or directly to the plant, with certificate of analysis and shipping documents.

04 Products

Ferro Manganese

FeMn

Used in steelmaking to increase strength, hardness and wear resistance, and to assist deoxidation and desulfurisation. Available in high, medium and low carbon grades.

Grade	**65% to 80% Mn**
Form	**Lumps, powder**
Applications	**Carbon and stainless steel**

Silico Manganese

SiMn

Adds manganese and silicon to steel in a single addition, improving strength and toughness while helping control production cost.

Grade	**60/14, 65/15, 65/16**
Form	**Lumps**
Applications	**Steel plants, foundries**

Ferro Chrome

FeCr

The main source of chromium for stainless steel, giving corrosion resistance, hardness and durability.

Grade	**58% to 70% Cr**
Form	**Lumps**
Applications	**Stainless steel, special alloys**

Ferro Silicon

FeSi

Used for deoxidation and refining in steelmaking and foundry work, and in magnesium production.

Grade	**65% to 75% Si**
Form	**Lumps, granules**
Applications	**Steel, foundries, magnesium**

Manganese Ore

Mn Ore

The main feedstock for producing ferro manganese and silico manganese, also used in chemical processing.

Grade	**35% to 48% Mn**
Form	**Natural ore**
Applications	**Ferro alloy production**

Ferro Molybdenum

FeMo

Used in high-strength steels that need resistance to corrosion and high temperatures.

Grade	**60% to 70% Mo**
Form	**Lumps**
Applications	**High-strength and special steels**

05 Product Specifications

Typical specifications of our main ferro alloys. Other grades, lot-specific analysis and material to the buyer's own specification can be offered on request.

Ferro Manganese, High Carbon

Element	75 - 80 Grade	70 - 75 Grade	65 - 70 Grade
Mn	75% - 80%	70% - 75%	65% - 70%
C	6% - 8% max	6% - 8% max	6% - 8% max
Si	1.5% max	1.5% max	1.5% max
P	0.35% max	0.35% max	0.35% max
S	0.03% max	0.03% max	0.03% max

Ferro Manganese, Medium Carbon

Element	78	75	70
Mn	78% - 80%	75% min	70% min
C	1.5% max	1.5% max	1.5% max
Si	1% max	1% max	1% max
P	0.25% max	0.25% max	0.25% max
S	0.03% max	0.03% max	0.03% max

Ferro Manganese, Low Carbon

Element	78	75	70
Mn	78% - 80%	75% min	70% min
C	0.5% max	0.5% max	0.5% max
Si	1% max	1% max	1% max
P	0.25% max	0.25% max	0.25% max
S	0.03% max	0.03% max	0.03% max

Silico Manganese, High Carbon

Element	60/14	65/15	65/16
Mn	60% min	65% min	65% min
Si	14% max	15% max	16% max
C	2.5% max	2.25% max	2% max
P	0.35% max	0.35% max	0.35% max
S	0.03% max	0.03% max	0.03% max

Ferro Chrome, High Carbon

Element	Specification
Cr	58% - 65% min
C	8.5% max
Si	4% max
P	0.05% max
S	0.05% max

Sizing (lumps, screened sizes, granules or powder) depends on the grade and source and is confirmed in each quotation. A technical data sheet is available for download at www.sfaglobex.ae.

06 Product Range and Markets

In addition to our core ferro alloys, we source other metals and minerals required by steel plants and industrial buyers.

Ferro alloys	Minerals	Scrap	Steel products
Ferro Manganese (HC, MC, LC)	Manganese Ore	Stainless Steel Scrap	Mild Steel Billets
Silico Manganese	Chrome Ore	Aluminium Scrap	Mild Steel Round Billets
Ferro Chrome			Stainless Steel Bright Bar
Ferro Silicon			Stainless Steel Coil
Ferro Molybdenum			Stainless Steel Square Bar
			Stainless Steel Pipe

Markets served

Middle East	UAE and regional customers
India	Producer relationships and supply
Europe	Steel plants and foundries
Africa	Steel and industrial buyers
Turkey	Steel plants

Customers in more than 40 countries have been supplied to date.

Quality, packing and documents

Chemistry

Material is checked against the buyer's limits before quoting.

Certificate of analysis

CoA or supplier test certificate available on request.

Inspection

Third-party inspection can be arranged for qualifying shipments.

Packing

One-tonne bags as standard. Other packing on request.

Delivery

To port, within the UAE or direct to plant, as per Incoterm.

Contracts

Spot orders and monthly, quarterly or project-based supply.

07 Working With Us

Why customers work with SFA Globex

Producer access	Direct relationships with ferro alloy producers in India.
Experience	Management with long experience in the ferro alloys trade.
Specification	Material offered against the buyer's own chemistry limits.
Timely supply	Just-in-time deliveries and recurring supply contracts.
Wide range	Alloys, ores, scrap and steel products from one supplier.

Information needed for a quotation

- ☐ Product and grade, or required chemistry
- ☐ Monthly or total quantity
- ☐ Size (lumps, granules or powder)
- ☐ Packing requirement
- ☐ Delivery location and Incoterm
- ☐ Required delivery date
- ☐ Inspection and document requirements
